About Enerco

Enerco was founded in 2003 to address the growing demand for power supply in Saudi Arabia. We recognized the need for a differentiated energy solutions provider capable of delivering flexible and customized solutions anytime, anywhere in the kingdom.

Our Vision

To be Saudi Distinguished Market leader and the primary choice for providing temporary and permanent integrated and sustainable energy solutions.

Our Mission

To build and maintain innovative solutions in a safe and compliant manner within Saudi Arabia, driven by talent and expertise to fulfill customer satisfaction while enhancing our commitment to the community.

Our Values

Integrity

We act with honesty and transparency, never compromising the truth.

We communicate openly and our actions are consistent with our words.

Quality

We make sure that all the services we provide are of a consistently high quality so that our team members, customers, partners, and suppliers can be proud of our work. We strive for continuous improvement with the goal of delivering the best services to our customers.

Customer Focus

We always aim to provide our customers with products and services that exceed their expectations.

This requires that we continuously listen to our customers in order to understand their needs and implement sustainable

A full-page background image of a male worker with a beard, wearing a blue hard hat and a blue work jacket with reflective silver stripes. He is focused on working on a large, green industrial machine. The text is overlaid on the left side of the image.

Innovation

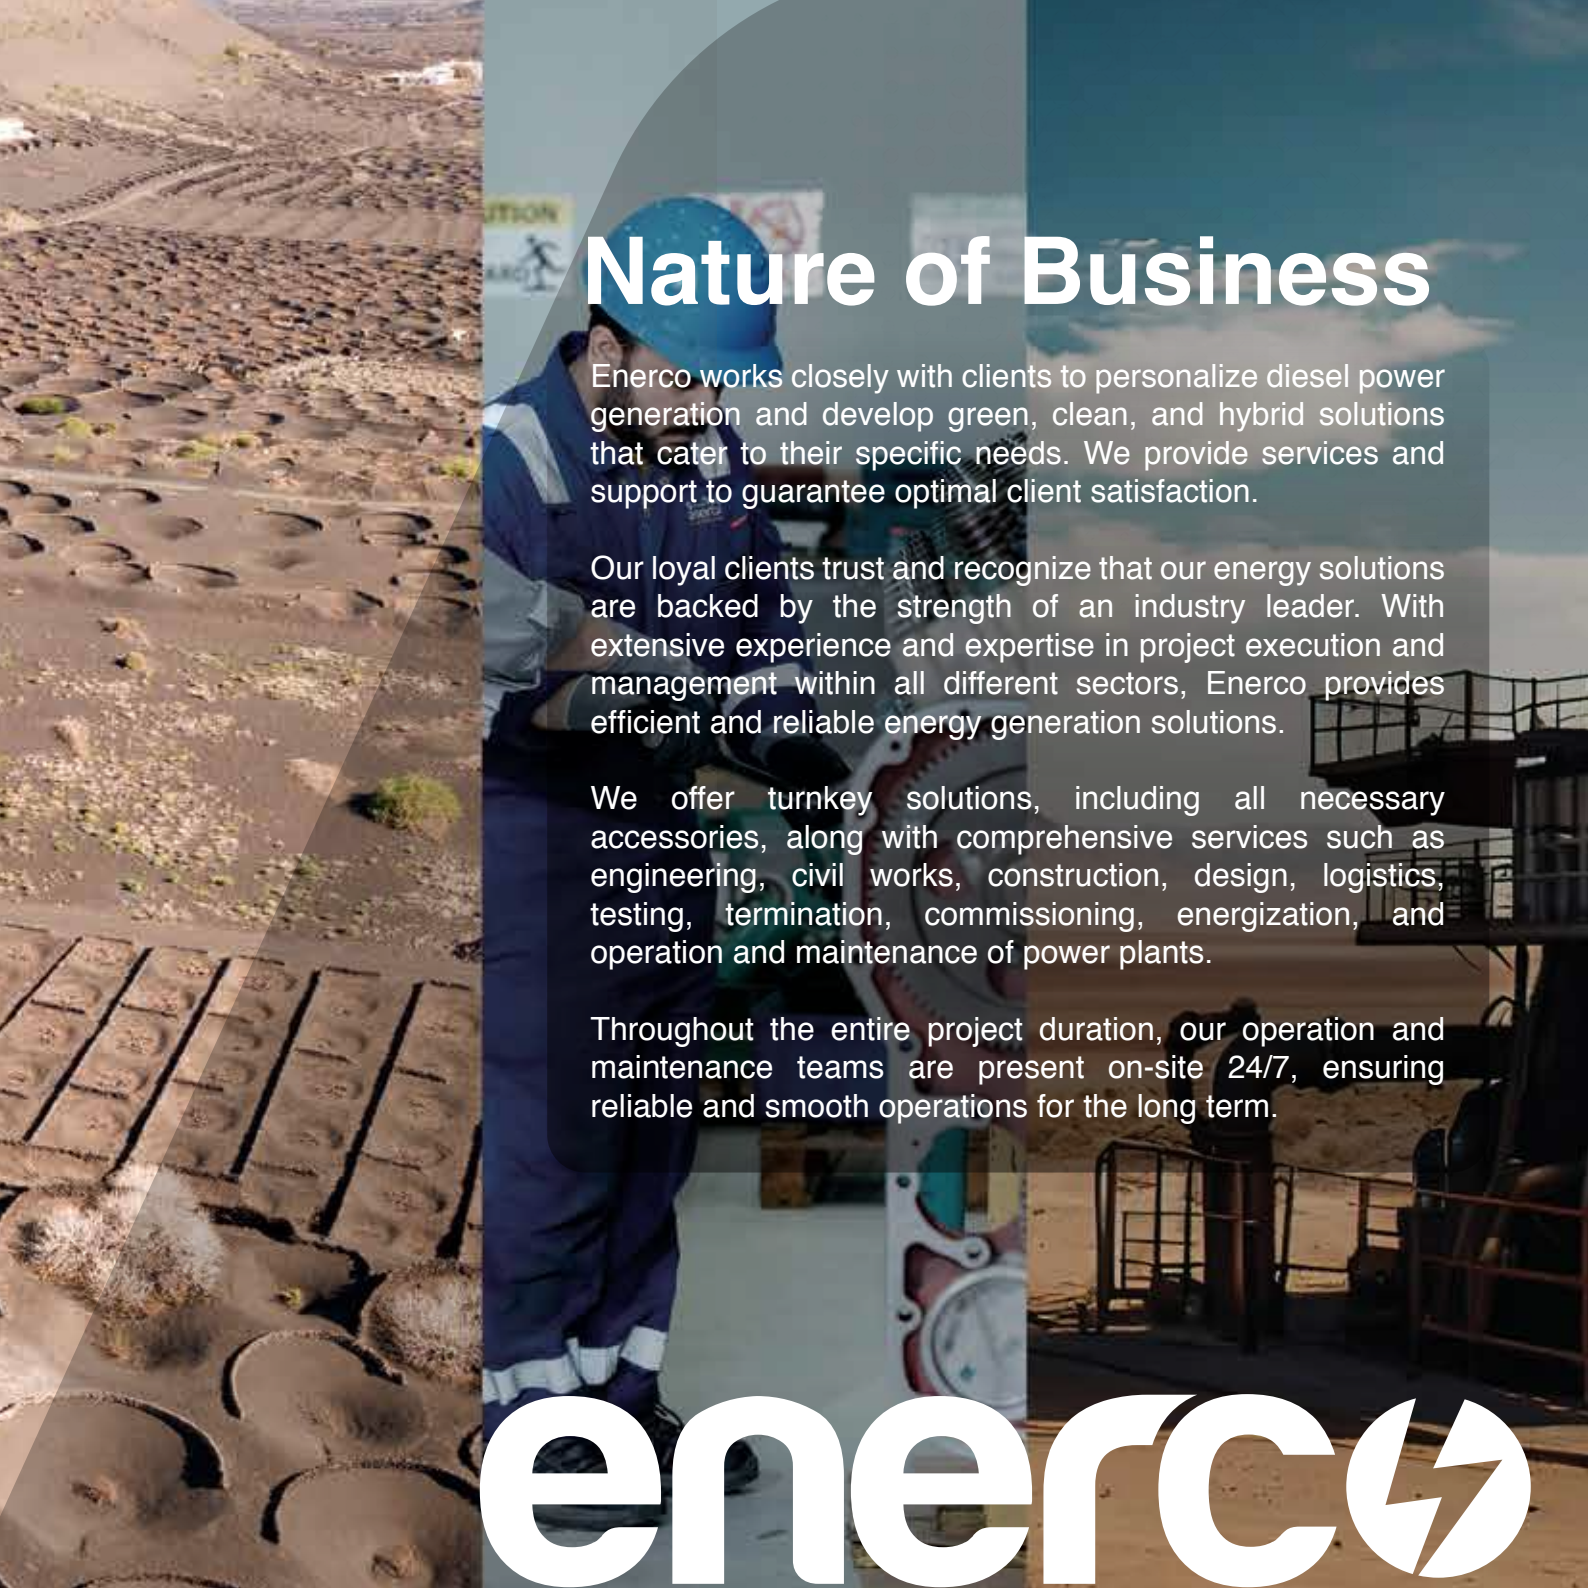

We approach our work with agility and flexibility, anticipating change and responding with effective solutions.

Growth

We will maintain a constant market presence with year-on-year growth by seeking to strengthen ties with our clients and increasing productivity, credibility, and profitability inside Saudi Arabia.

Respect

We treat our team members, customers, partners, and suppliers with mutual respect and consideration, recognizing the importance of diversity and valuing their contributions.

Nature of Business

Enerco works closely with clients to personalize diesel power generation and develop green, clean, and hybrid solutions that cater to their specific needs. We provide services and support to guarantee optimal client satisfaction.

Our loyal clients trust and recognize that our energy solutions are backed by the strength of an industry leader. With extensive experience and expertise in project execution and management within all different sectors, Enerco provides efficient and reliable energy generation solutions.

We offer turnkey solutions, including all necessary accessories, along with comprehensive services such as engineering, civil works, construction, design, logistics, testing, termination, commissioning, energization, and operation and maintenance of power plants.

Throughout the entire project duration, our operation and maintenance teams are present on-site 24/7, ensuring reliable and smooth operations for the long term.

Products and services

Turnkey Power Solutions on a Rental Basis

We provide multi-megawatt temporary power solutions, including full operation and maintenance for both low-voltage (LV) and medium-voltage (MV) applications. Our focus on quality and reliability guarantees that our customers receive top-notch service.

Hybrid and Renewable Solutions

Available on both rental and supply bases, our hybrid solutions include a variety of options including:

- Solar solutions
- Diesel generators
- Battery energy storage systems
- Biofuel generators

All which can cater to the needs of our customers and result in better and cleaner energy source providing.

Rental Solutions of All Capacities

Our fleet features diesel generators from 100 kW to 1000 kW, as well as hybrid systems and biofuel generators, all equipped with essential accessories such as transformers, fuel tanks, MV and LV cables, panels, and switchgears.

Products and services

Comprehensive Engineering Support

We tailor solutions to meet end-user needs across the entire power project lifecycle, ensuring maximum flexibility and reliability in the systems and services we offer.

Supply of Premium Quality Generators

Available in various sizes and brands, ENERCO offers reliable and highly efficient power solutions tailored for industrial users. Our generators cater to a wide range of applications, providing a continuous, dependable, and safe power supply for both backup and prime power needs.

Products and services

Operation and Maintenance Services

Maintaining safety and reliability while maximizing profit are the core goals of plant operation. To realize this, ENERCO offers wide-ranging Operation and Maintenance services for all diesel power generated projects, including stand-alone generator maintenance to a complete diesel engine power plant operation and maintenance services including:

- o **Scheduled inspection**
- o **Regular maintenance**
- o **Addressing any potential issues or malfunctioning**

Battery Storage Solutions

ENERCO Energy's 1MWh-5MWh Battery Energy Storage System (BESS) in a 20FT container is an advanced energy storage solution for commercial and industrial use. This scalable and reliable system helps businesses optimize energy consumption, providing efficient storage and integration with renewable energy sources

Products and services

1. ENERCO's new generator operates on Biodiesel FAME B100, which can be produced from a variety of vegetable oils and fats.
2. Available sizes reach up to 500KVA.
3. ENERCO is accredited under the Saudi Made scheme and ISCC, and our fuel complies with the EN14214 standard when independently tested.

With this innovative technology, the ENERCO BIOFUEL generator is versatile, suitable for continuous power, standby power, and applications in industrial, commercial, and residential sectors. Biodiesel is more accessible than ever, with suppliers throughout the kingdom. When choosing biodiesel generator, choose ENERCO.

Gas Microturbines

ENERCO generation solutions help to improve operations by putting the end-user in control of their energy costs. Advanced engineering and more than 100 patents put ENERCO microturbines in a class of their own. By integrating an aero-based turbine engine, a magnetic generator, advanced power electronics, with patented air bearing technology, our microturbines are the ideal solution for today's distributed energy needs.

ENERCO Microturbines operate on a variety of fuels, including natural gas, associated gas, biogas, LPG/propane, flare gas, landfill gas, renewable natural gas (RNG) and hydrogen fuel blends. In resource recovery applications, microturbines burn waste gases that would otherwise be flared or released directly into the atmosphere.
